

EE-3a Use Case Results and Broad Area Announcement updated 1 September 2000

Prepared by
DITT Core Team
Center for Army Lessons Learned

DITT Implement Use Cases, EE-3a

DITT RIM Projects - Use Cases, EE-3a

- Implementation of Object Oriented Use Cases, EE-3a Prototype
 - The DITT has produced 16 use cases and 59 associated functional requirements that are believed to be necessary in order to implement a records management application as a component of an enterprise system within a mission environment.
 - This initiative seeks to engage commercial electronic document and records management software developers in a collaborative effort to prototype and test a system proposed in the Functional and System Use Cases for Records Management Application Environment drafted by the DITT.
 - Announcement to be released for bidding October 2000
